Sex and Age

- In 2000, San Antonio had approximately the same number of women as men. Alameda County had 51% women and 49% men.
- Children under 14 years of age made up 23% of the community in San Antonio, as compared to 21% in Alameda County as a whole.
- Seniors (65 and older) made up 8% of the San Antonio population, as compared to 10% countywide.

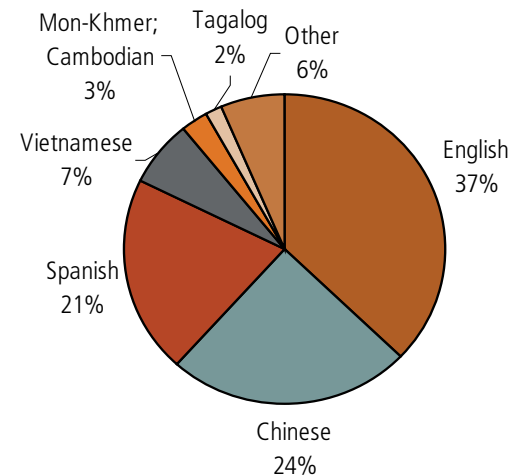

San Antonio Age Distribution by Sex, 2000

Language

- In 2000, 37% of San Antonio residents age 5 years and older spoke only English at home.
- The breakdown of languages in San Antonio homes was Chinese (24%), Spanish (21%), Vietnamese (7%), Mon-Khmer/Cambodian (3%), Tagalog (2%), and some other language (6%). This included people who can speak English in addition to other languages.

San Antonio Language Spoken at Home, 2000

Household

- In 2000, there were 11,792 households in San Antonio, an 8.1% increase over the 10,911 households counted in 1990.

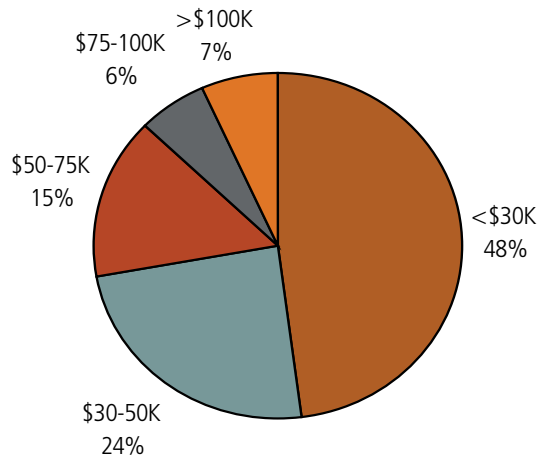

Income and Poverty

■ Almost half (48%) of households in San Antonio earned an income of less than \$30,000 in 1999, as compared to 26% in Alameda County as a whole.

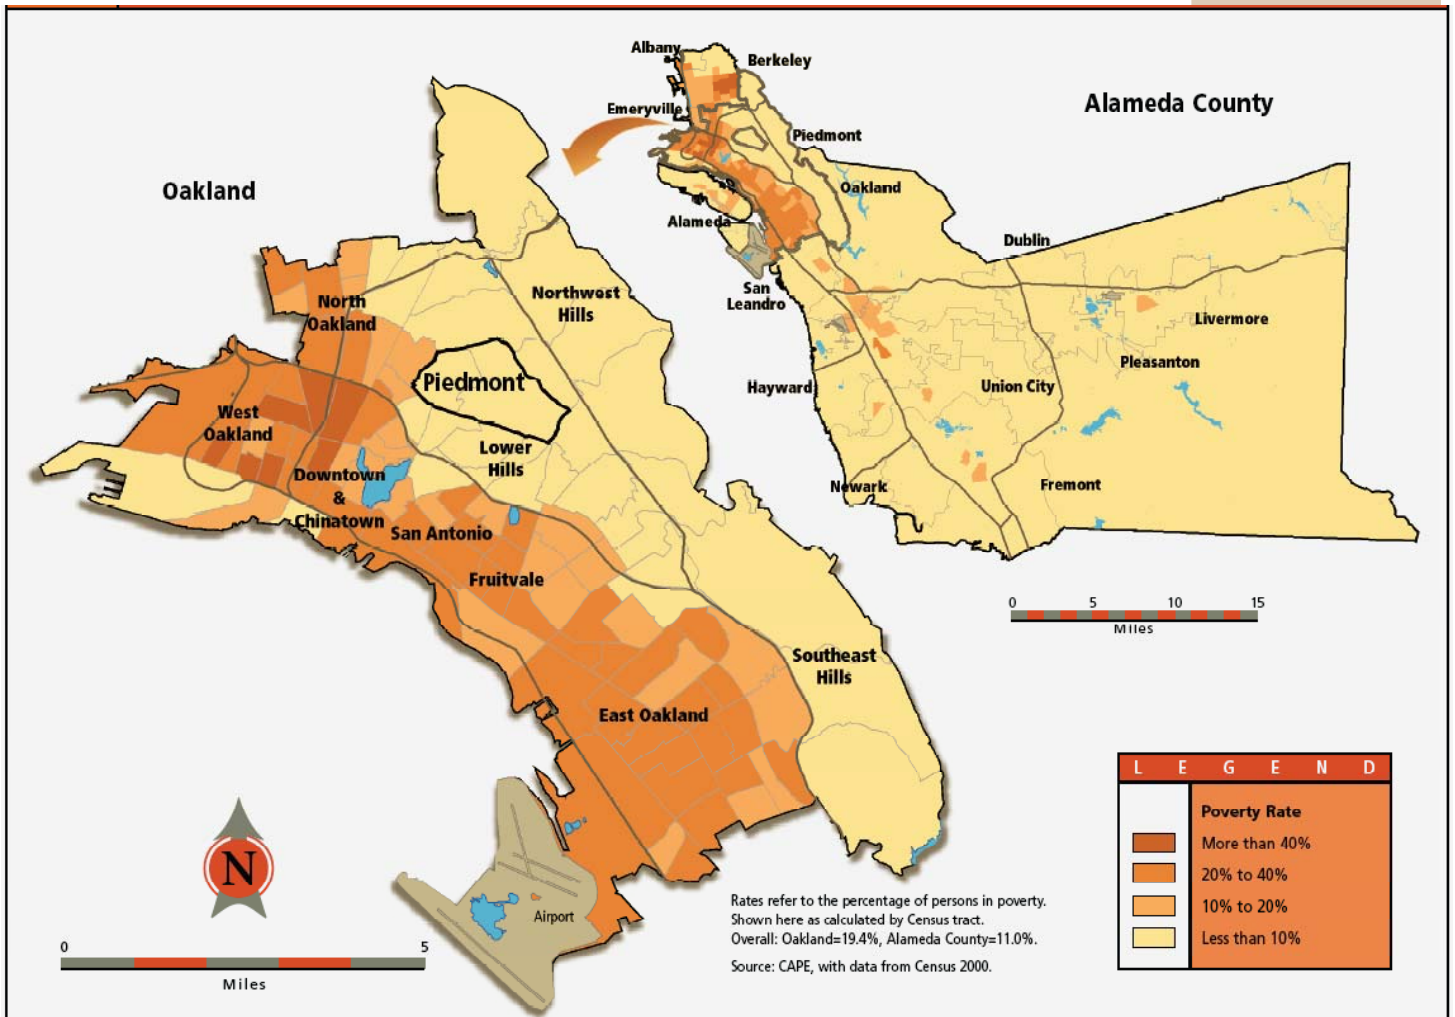

■ In 1999, half of all households in Alameda County earned more than \$46,795. In 1999, half of the households in the richest census tract in San Antonio earned more than \$36,918, while half of the households in the poorest census tract earned less than \$27,318.

■ Another way to look at income is through a poverty level established by the federal government. According to this method, people under a certain income level are considered poor. The map below shows the percent of people living in poverty in 1999. The poverty level for a family of four was \$16,895 in 1999.

Oakland and Alameda County Poverty Rate, 1999

Employment and Occupation

- 14,758 people in San Antonio age 16 years and older were employed in 2000.

- Approximately 27% of employed San Antonio residents worked in sales and office jobs. These included retail workers, secretaries, and postal clerks.

- In 2000, 22% of San Antonio workers held service jobs such as firefighters, police, housekeepers, childcare workers, cooks, waiter/waitresses, janitors, and hairdressers.

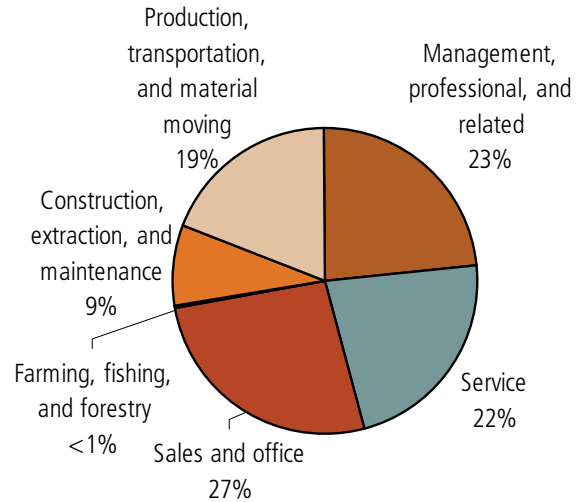

- 19% of San Antonio workers were employed in production, transportation, and material moving occupations, including bus drivers, movers, and aircraft control operators.

- Construction and maintenance workers made up 9% of the workers. These included construction trade workers, installation, maintenance, and repair occupations.

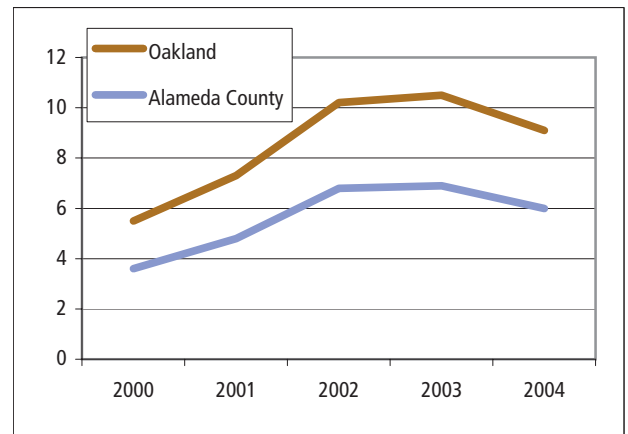

- About 23% were employed in management, professional, and related occupations. These included executives, engineers, teachers, lawyers, and nurses.

- In 2004, approximately 9.1% of Oakland residents age 16 or older were unemployed. This is compared to 6.0% in Alameda County as a whole.

San Antonio Occupations, 2000

Oakland Annual Unemployment Rate, 2000-2004

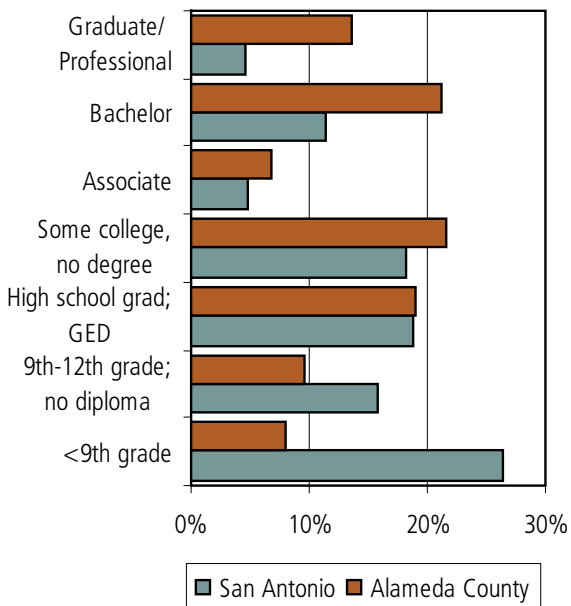

- Unemployment in Oakland increased from 2000 to 2003 and had a slight decline in 2004.

Education

- In 2000, about 16% of San Antonio residents aged 25 and older had completed college (bachelor's degree) or held a graduate/professional degree. For Alameda County as a whole this figure was 35%.
- About 18% in San Antonio had completed some college (but had not graduated) and 5% had completed an associate degree. This was similar to 22% who had attended some college and 7% who had completed an associate degree in Alameda County as a whole.
- Approximately 19% of San Antonio residents had graduated from high school or passed the General Educational Development (GED) exam. In Alameda County as a whole, 19% had finished high school or held a GED certificate.
- 42% of San Antonio residents ages 25 and over did not have a high school degree. This figure was 18% in Alameda County as a whole.

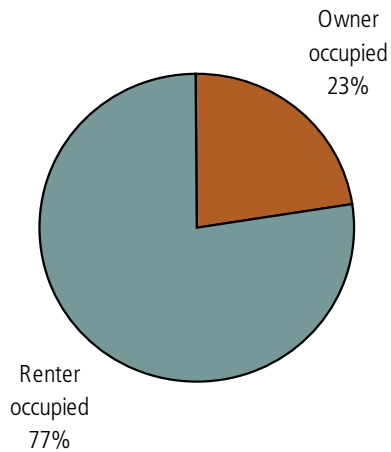

San Antonio Educational Attainment, 2000

Housing

- In San Antonio, there were 12,291 housing units in the year 2000. About 4.1% of these were vacant.
- On average, there were 3.1 persons per household in San Antonio, as compared to 2.7 in Alameda County.
- About 23% of San Antonio homes were occupied by the owner in 2000.

San Antonio Tenure, 2000

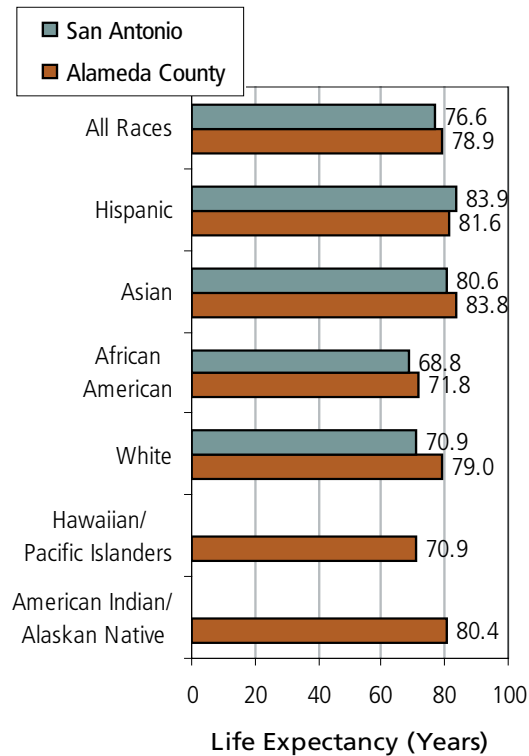

Mortality

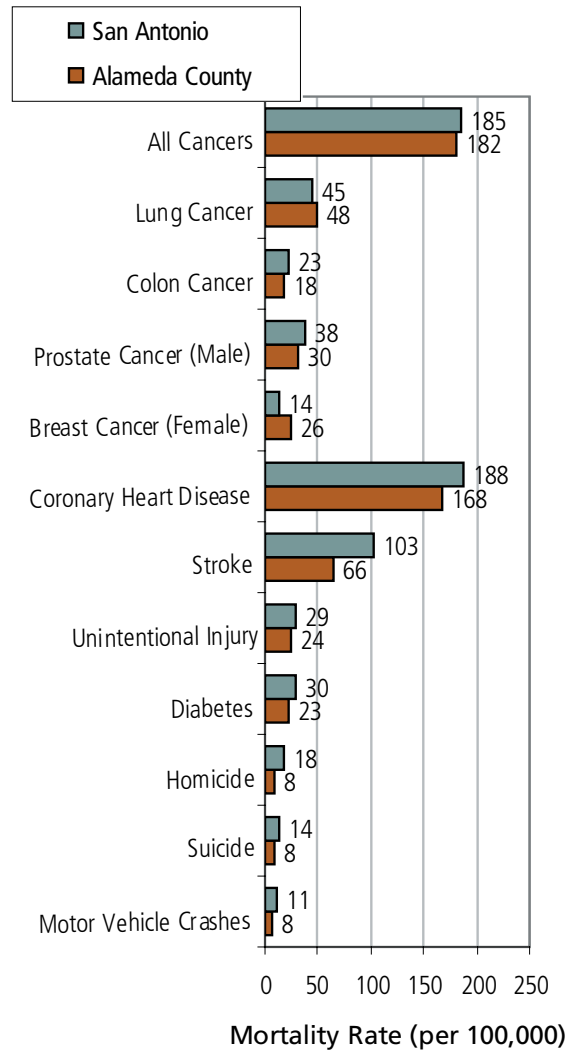

- Life expectancy is the average number of years of life to be expected if current mortality rates continue.
- The life expectancy in San Antonio for the years 2000 to 2003 was 76.6 years. This is 2.3 years less than the county as a whole.
- The life expectancy for each West Oakland racial/ethnic group except Hispanics was less than the life expectancy for that group in Alameda County.
- The life expectancy for Hispanics in San Antonio was 83.9 years.

- The number of deaths in a defined group of people during a given period is called the mortality (or death) rate.
- The mortality rate for all causes of death in San Antonio was 849 per 100,000 people between 2000 and 2003. This is 12% higher than the Alameda County rate of 756 per 100,000.
- The mortality rate for each cause of death is higher in San Antonio than in Alameda County. The only exceptions are breast cancer and lung cancer, which had slightly lower rates.

San Antonio Life Expectancy, 2000-2003

West Oakland Mortality Rate, 2000-2003

- Heart disease and cancers were the top two causes of death for all race/ethnic groups in San Antonio. For Asians, cancers were the first leading cause of death. For the other race/ethnic groups, heart disease was the first leading cause.
- Stroke was the third leading cause for each race/ethnic group except for Hispanics.

Leading Causes of Death by Race/Ethnicity, 2000-2003

Rank	Hispanic	Asian	African American	White
1	Heart disease (12)	Cancers (70)	Heart disease (113)	Heart disease (34)
2	Cancers (11)	Heart disease (46)	Cancers (72)	Cancers (27)
3	Unintentional injuries (7)	Stroke (41)	Stroke (36)	Stroke (11)
4	Chronic liver disease and cirrhosis (5) Homicide (5)	Chronic lower respiratory diseases (16)	Diabetes (18)	Unintentional injuries (8)
5	♦	Unintentional injuries (10) Suicide (10)	Unintentional injuries (15) Homicide (15)	Chronic lower respiratory diseases (5)

Notes: The numbers in () are the four-year total number of deaths.

♦ Fewer than five deaths during the four-year period.
